Re: ACE Glass

To Whom it May Concern:

Nabholz Construction has used ACE Glass for many projects over the years. They have been a good partner to us by not only performing their scope professionally but also by investing in our industry. On the CARTI Cancer Center project, they were proactive in identifying challenges and solutions and worked well with our team. They also did a good job of managing their manpower and material procurement and pushed hard with us to finish the project, which had an aggressive timeline. We look forward to working with them again on a number of upcoming projects and highly recommend them for their work.

Sincerely,

Nabholz Construction Services
