ABC EIC Award Committee

It is my great pleasure to write this letter of recommendation on behalf of ACE Glass in the construction of Hunt Tower located in Rogers, AR. I have had the pleasure of working in collaboration with ACE Glass for the past 8 years, and can state with confidence that this company is extremely knowledgeable in their field of work.

ACE Glass's scope of work included the entire exterior envelope of the building as well as numerous design details inside and out.

The building shell consisted of aluminum composite panels and glass curtain walls. ACE was integral in working with our team to come up with a design option that met our client's needs. They worked hand in hand with us from the early stages to develop two iridescent paint coatings for the panels as well as helping us develop all of the connections of these panels to each other and the building sheathing. They also worked with us on every facet of the curtain wall system as well as the sleek custom glass entry canopy to the building. The collaboration with ACE didn't stop with the exterior, but also brought in custom interior glass ceiling elements into the main lobby of the building. We also developed more details for the composite panels in the lobby to create column wraps with inset lighting elements.

I personally look forward to a continued working relationship with ACE Glass. Our office recommends ACE Glass to all General Contractors. Their dedication, craftsmanship and management went above and beyond on this successful project.

Respectfully,

Dusty Graham, AIA
